Mood Tracker

Username / Email
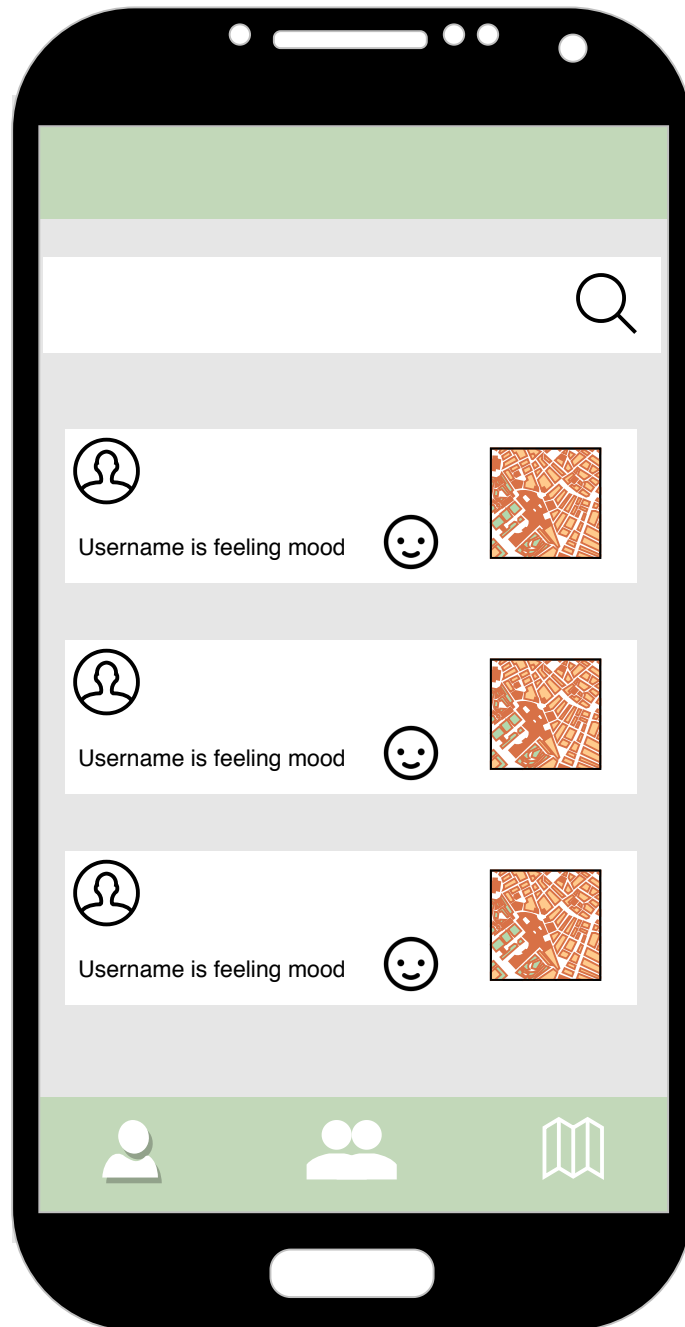

Password

Login

Or Register

Start Up Screen

1. Sign in using unique username to pull previous posts/ people they "Follow".

2. Or create a fresh account with a username that is not used already.

Home Screen

1. Display mood feed of *Users* friends as well as own *Posts.*

2. Allow Filter / Search of mood feed by :
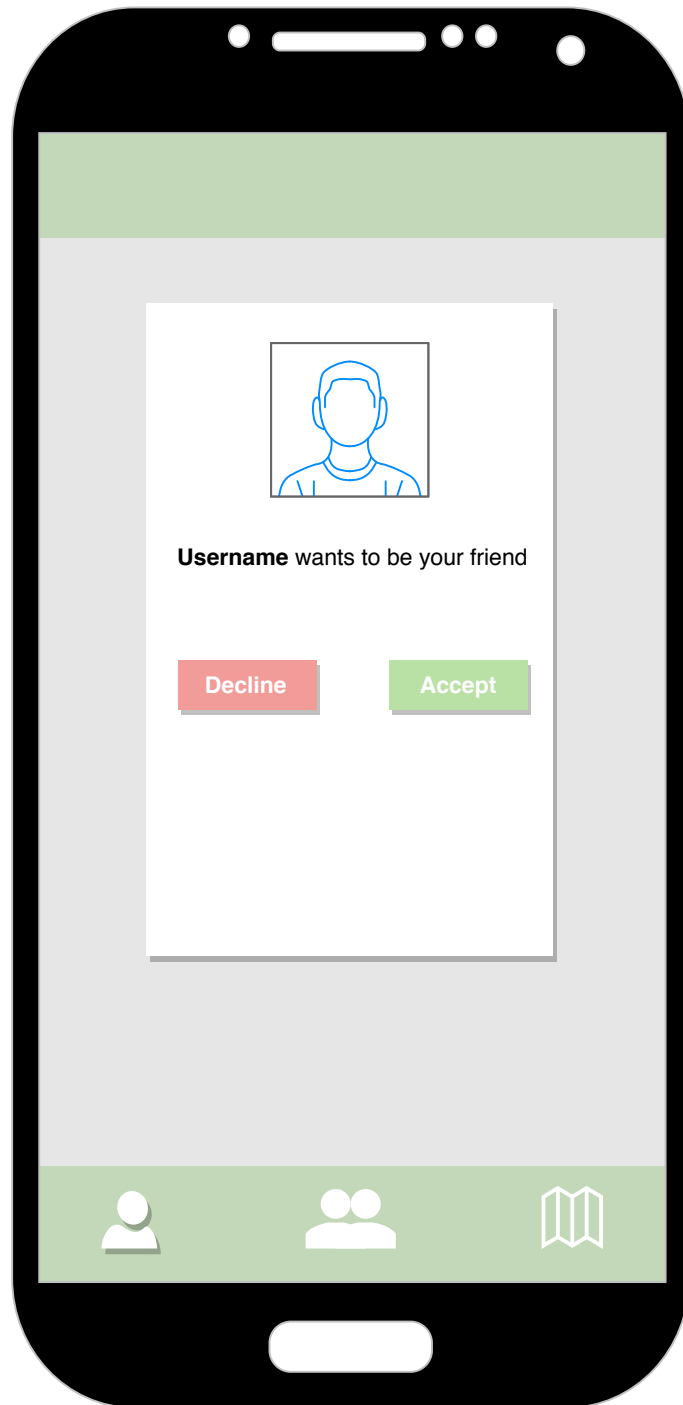

- *Mood*
- *Friends*

3. Search bar at top to search for *Users*

Username is feeling mood

Username is feeling mood

Username is feeling mood

User / Profile Screen

1. Allow User to create new Mood

2. Display Profiles username

3. Display Users Mood History

4. Allow user to edit and delete Moods from Mood History

Add Friend / Accept Friend Request

1. Pop-up when a user is searched and "selected from list" to send a request

2. Alternatively, a pop-up that appears when a request has been received

3. On received side of a request, Potentially just make this a button that flashes in corner of home screen or something when a request is pending instead of a pop-up for each request)
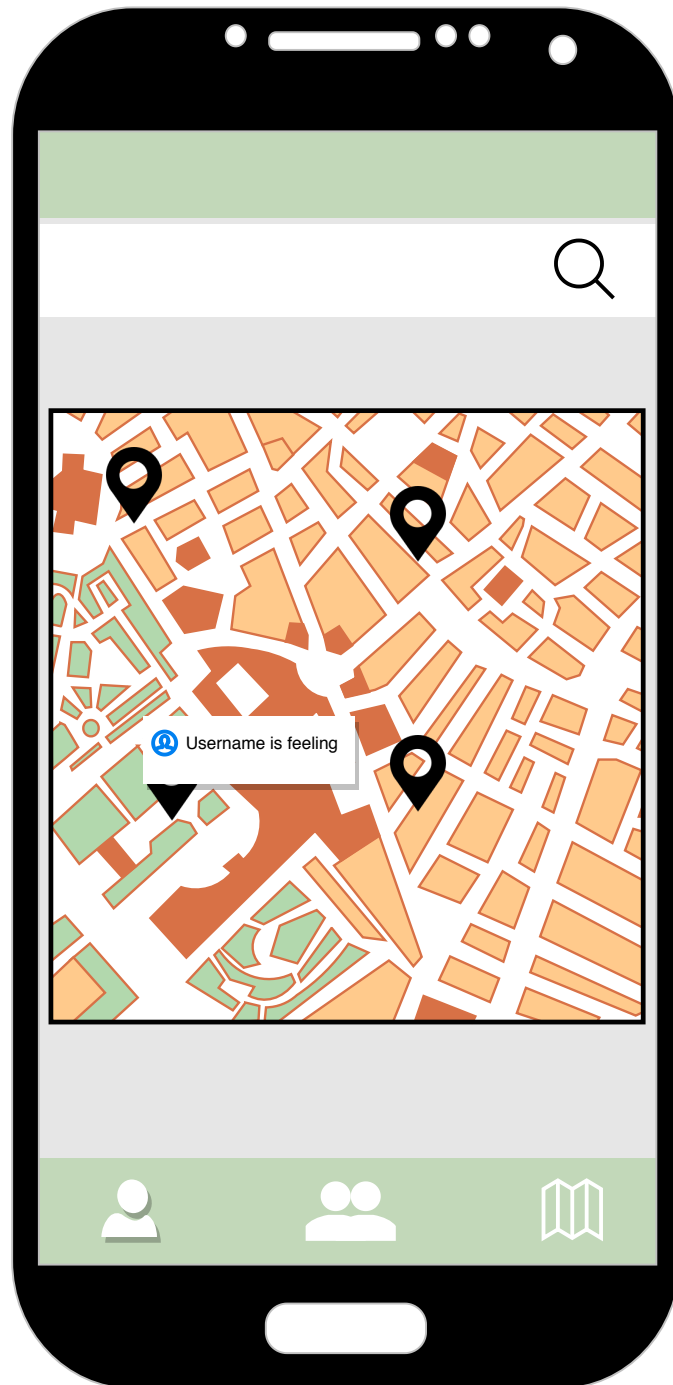

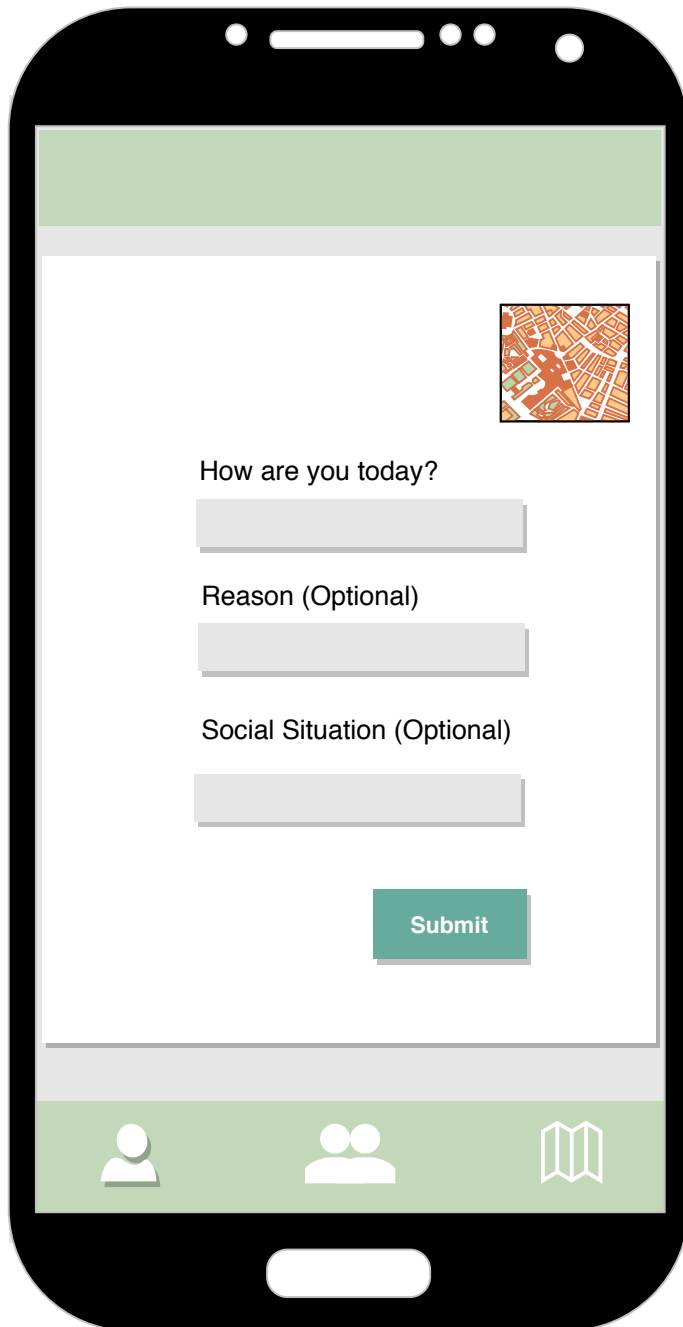

Post Item

- Username.

- Post Mood (with consistent colours and emoticons)

- Location of Mood.

Location Fragment

1. Displays mood and location as well as others moods and locations followed by their username

2. (Accessory: Filter by mood on map only displaying the locations of "one mood")
